

ANNOUNCEMENT: PRODUCT NAME CHANGE

Date: September 18, 2017

To: All Customers

Subject: Oasis and Oasis Three Name Change

Within the next sixty days, Solid State Cooling Systems (SSCS) will be changing the name of the SSCS **Oasis** and **Oasis Three** product families. The change is being made to avoid potential market confusion with another company's products which use the name "Oasis".

The SSCS **Oasis** products will be renamed as the SSCS "Ultra Compact" or "UC" family of chillers:

- Oasis 160** will be renamed **UC160**
- Oasis 170** will be renamed **UC170**
- Oasis 180** will be renamed **UC180**
- Oasis 190** will be renamed **UC190**

The SSCS **Oasis Three** products will be renamed as the SSCS "**T-Three**" family of products, where "T" stands for "Tabletop".

Other than the name change, the products will be identical to the existing SSCS products. The part numbers, design, specifications, form / fit / function will all remain exactly the same as SSCS's current products, except for the name change. There is no requirement for you to make changes to your purchasing system or purchase orders, since part numbers are not changing. You can certainly update the description of the products to reflect the name change if you want, but this is not a requirement.

In parallel with changing the names of the Oasis and Oasis Three product families, SSCS has started to introduce a next generation set of products which are enhanced versions of the Oasis and Oasis Three products. Earlier this year SSCS announced the new **TCube Edge** family of products, which expands the Oasis Three / T-Three product line into a full family of cooling capacities, with added features and lower cost entry models. Later this year SSCS will be Beta Testing another new product family called **TCube Mini**, which is a slightly taller version of our Oasis / UC products with a larger fluid reservoir. SSCS will also be introducing 270 Watt version of this family to provide even more cooling capacity in an ultra compact form factor.

If you have any questions about this announcement or about SSCS's new product families, please feel free to contact us via email at info1@sscooling.com or call us at 1-845-296-1300.
