

# TECHNICAL BULLETIN

## DESCRIPTION:

**UC150 (Oasis 150) End of Service Notification**

**TB#: 1090**

**DATE: June 10, 2021**

## DISCUSSION:

### **UC150 (originally called Oasis 150)**

Solid State Cooling Systems is announcing that after December 31, 2021, we will no longer commit to service any Ultra Compact **UC150** units (originally called **Oasis 150**). This product was sold by us between 2005 and 2015, before it was replaced by our current UC160-190 Ultra Compact family of thermoelectric recirculating chillers. Due to the age of the product and the limited availability of some components, it is no longer practical for us to continue servicing these units. We will continue to sell spare parts as long as these parts are available, but availability is not guaranteed.

We are happy to offer functional equivalent configurations of our UC160-190 chillers to meet the needs of any application where UC150 (Oasis 15) was previously used. To review the available UC160-190 configurations or to obtain a quote, either visit the product page on our website:

<https://www.sscooling.com/product/uc160-190>

or contact us by sending an email to [info1@sscooling.com](mailto:info1@sscooling.com)

**If you have any questions, please contact Kevin Carswell,  
email: [kcarswell@sscooling.com](mailto:kcarswell@sscooling.com) or phone: 1-845-702-2819.**
